

WomenLeadersOnFire™: Fall Muskoka Retreat
September 20 and 21 2008
Huntsville, Muskoka

**Calling all women leaders from the corporate, non-profit,
governmental and entrepreneurial sectors!**

It has been said that progressive leadership is about the increasing ability of a leader to expand her influence. *Expanding the influence of a leader is accomplished by growing the leader themselves.*

So in what ways do you need to grow? Is it in skill or is it in character?
What impact do you want to have?
How do you increase that impact in a way that aligns with who you wish to be as a woman and as a powerful leader?
Where do you struggle? What takes you out of the game?

Knowledge has little value unless it is applied. Getting real is about practical learning, self-reflection, clearly setting goals, articulating a plan, taking action, accepting accountability, establishing great habits and managing the use of your time.

Examples of some of the things you will take away from the OnFire Retreat include:

- Increased self-awareness and how to leverage this awareness to maximize performance and fulfillment
- An exploration of how to deal with self-limiting beliefs, fears, and habits that hold you back and stop you from following through on what's most important
- Knowledge and application of proven success habits and avoidance of factors that lead to underperformance and failure
- A framework for the development of a Personal Strategic Plan that reflects your core strengths, the root cause of your gaps and organizational outcomes that matter.
